EDUCATION

University of Pennsylvania

M.S.E. in Computer & Information Science | **GPA: 3.90/4.00**

Aug 2024 - May 2026

Philadelphia, PA

Northeastern University

B.E. in Software Engineering | **Rank: 5/396** (record: Sep 11, 2023)

Sep 2020 - Jun 2024

Shenyang, China

RESEARCH & OPEN-SOURCE EXPERIENCE

Graph-of-Skills (GoS)

EMNLP 2026 (Main Conference)

Contribution: First author and designated Core Contribution author; authored the initial public implementation and led the reported experiments. Implemented dependency-aware retrieval with hybrid semantic-lexical seeding, reverse-weighted Personalized PageRank, and budget-aware loading. **Results:** **25.6% higher reward** (+7.0 absolute points), **56.7% fewer total tokens** vs. full skill loading on 1,000-skill SkillsBench (GPT-5.2 Codex).

Dr. Claw

EMNLP 2026 (System Demonstrations)

System: AI scientist workspace. **Contribution:** One of the core contributors and active maintainers; 51 non-merge commits to main (#4 contributor). Authored the merged cross-platform desktop/release PR; model-provider integrations, project/session workflows, and reliability fixes.

COMFYCLAW

2nd MUCG Workshop at ECCV 2026

Typed-graph harness: validation, rollback, repair, skill evolution. **Contribution:** Equal-contribution coauthor.

PROFESSIONAL EXPERIENCE

ByteDance Inc.

Jun 2026 - Present

Software Engineer Graduate (Commerce Ads) — 2026 Start (BS/MS)

Seattle, WA

- **Agent operations:** Built LLM-driven incident-triage workflows for evidence-grounded fault localization, incident-state tracking, recovery analysis, and recurring reporting.
- **Inference infrastructure:** Built an Anthropic/OpenAI-compatible gateway for coding agents, preserving streamed reasoning and tool continuation through context compression, concurrent turns, cancellation, and recovery.
- **Service validation:** Unified CI, test deployment, controlled traffic, and commit-traceable runtime verification in an AI-assisted workflow.

ByteDance Inc.

May 2025 - Dec 2025

Software Engineer Intern, Commerce Ads

Seattle, WA

- Developed Shop Ads image selection using posterior features, exploration-exploitation ranking, and multimodal LLM quality evaluation.
- Automated creative generation with scheduled generation and Flink-backed asset persistence for high-value products; built modular preview/diagnostics with test-entity injection for ad-format and rollout validation.
- Optimized product-serving reliability and tail latency through caching, asynchronous batch fetches, and offline computation.

Amazon

Jun 2024 - Aug 2024

Software Development Engineer Intern, Global-Mile Team

Beijing, China

- Instrumented distributed requests without application changes using a ByteBuddy-based OpenTelemetry Java agent for payload capture and tracing.
- Correlated traces by business ID across partially instrumented services; dynamically selected Kinesis or SQS for Fargate and Lambda runtimes.
- Built a React/Java diagnostics console with searchable trace, timeline, and payload views.

JD Technology

Jul 2023 - Oct 2023

Software Engineer Intern, Algorithm Tools

Beijing, China

- Redesigned Kubernetes resource management with ConfigMaps, Informers, asynchronous updates, and sharded locking to reduce cold-start overhead.
- Modularized campaign-page generation with the Strategy pattern and generative AI; improved multi-tenant delivery with Argo Workflows, Argo CD, and Helm.

RESEARCH IMPACT & SERVICE

- Google Scholar.** 86 citations across six selected works (Sep 12, 2026).
- Research use.** GoS: 14 source-checked papers document public-asset use, implementation or reimplementa-tion, controlled comparison, or component reuse and testing (Sep 12, 2026).
- GitHub interest.** GoS: 203 stars, 25 forks; Dr. Claw: 1,050 stars, 116 forks (Aug 31, 2026).
- Peer review.** ACM CAIS Workshop AgentSkills (2026): Completed reviews of two assigned papers; service acknowledged by the organizing committee.

SELECTED HONORS

- Winner, Apple Swift Student Challenge** 2026
Created **Aura Chef**, a touchless Swift playground with hand-pose recognition and voice commands; selected as one of 350 winners from 37 countries and regions.
- China Collegiate Computing Contest - Mobile Application Innovation** 2022
Team lead & sole software developer of *Trace Note* (iOS/AR); National Final Second Prize and Northeast Division Innovation Track First Prize.
- National Scholarship for Undergraduate Students** 2020-2021
Ministry of Education, China.

TECHNICAL SKILLS

- | | |
|---------------------|---|
| Languages | Python, Go, Java, C/C++, JavaScript/TypeScript, SQL, Swift |
| Agent/ML | LLM agents, tool calling, retrieval/GraphRAG, multimodal evaluation, PyTorch |
| Systems/Data | Distributed services, MySQL, Redis, Elasticsearch, Kafka; Flink, Thrift/Protobuf, OpenTelemetry |
| Cloud/DevOps | Docker, Kubernetes, AWS, Helm, CI/CD, Grafana |
